MLrohde: I made this stand out of PVC pipe for less than \$10. I think it turned out cute.

I used 1 1/2 inch PVC pipe. I don't think it would matter what size you chose. I used 2 cross like connectors, I don't remember what they were called and 6 end caps and a 5 ft section of PVC pipe. I just cut the pipe in approximate lengths of a 2 year old and assembled it. I cut a hole in one of the caps and the base and assembled that with a bolt and nut. It is a little wobbly because the cap is rounded. I may try to find a flat cap. I haven't tried, but I hear rubbing alcohol will remove the words. It also makes a great bicycle for a 2 year old-or maybe a horse.

Then AmandaNMV made this one:

Wasn't it fun? I made one too because I was tired of not having any way to display my clothes. Here's a pic of mine. The idea originally started when I wanted "hair" to display my hair bows and thought well, I might as well add a body too.

Here are some intermediate pictures:

I used 1/2" PVC pipe. The OP version is much simpler but like I said I had originally started out just wanting a head with hair for bow display and then decided to build the body to go with it. I wish I would have made it just a big bigger. It's about a size 2T...The outfit in the pic I posted is a size 2T outfit.

Then Hilary got in the groove:

I did mine slightly different:

DH went to town with this. He used PVC for the base, with a couple of elbow joints, so he didn't have to figure out how to attach it to a nice board (he said mine is the lazy man's version!) He also drilled holes, so there is a dowel that I can stick through to adjust the height of the pants hangers. And excuse the mismatched dollar store clips, they are now real matching clothespins 😊

Another thing he did was cut two different widths for the shoulders, so I can swap them out for different sizes, and they have coordinating wider dowels. He also made a longer top piece that I can put on to put up a hood or whatever.

Like I said, he went to town. But the bill at Lowes was less than \$10 and it was done!
